✓ PRIVACY MEETS DESIGN

A notable advantage of panel slide blind is ease of use. The sliding mechanism provides a way of improving accessibility of the inside of a home. This is good news for homeowners with limited mobility since it means that they can use the blinds to easily separate the areas of their houses. And when you're in the mood to open up airy spaces to let light and views flood in, the panels glide away smoothly into a neat, discreet stack in just seconds.

Cord operation. To draw the blind across, gently pull down on the front cord attached to the control end of the headrail. To re-open the blind, pull down on the rear cord.

Wand operation. To open and close the blind, pull the wand attached to the top of the rear panel.
